

## I'll Wait For You

You went away  
Yesterday  
With something to prove  
Set your path  
Sailed away  
Far away  
And there you entertained danger  
Suffered at the hand of a stranger  
And now you can't see a way home  
This is not what I designed for you

*But I'll wait for you*  
*But I'll wait for you*

Now looking back  
All the time  
You would talk to me  
And I look  
Out for you  
Every day  
But you are too ashamed  
To lift your head up  
Look me in the eyes and  
Tell me that you still want me  
I will love you whatever you have done

I've got a ring my daddy gave me  
I'll put it on your finger  
And a coat to keep you warm  
I've got a pair of comfy shoes  
You can put them on your feet  
And I'll prepare for us a feast
